Level 3 is an international communications and information services company and is headquartered in Broomfield, Colorado. The company operates one of the largest communications and Internet backbones in the world. Since our founding in 1998, Level 3® has been focused on delivering premier services over one of the world's most advanced, IP-optimized networks. Level 3 owns and maintains over 48,000 intercity route miles. We offer a comprehensive portfolio of network offerings that spans Internet Protocol (IP) services, broadband transport, colocation services, and patented Softswitch-based managed modem and voice services. Level 3 also uses these network services as a foundation for delivering enterprise telecommunications solutions.

Level 3's VPN services are designed to provide customers a private, dedicated wide-area network capability that supports their dynamic network and application requirements. VPN services enable organizations to prioritize network application traffic so that high-priority applications such as voice and video are not compromised in performance by the flow of low priority applications such as email over a secure network infrastructure.
